

VHIFT/III

VHIFT/III 302

PRODUCT DESCRIPTION

VHIFT/III is a bench-mounted impulse heat sealer featuring an automatic sealing mode, electronic foot switch, timer, and cool-down cycle. With multiple model options, you can achieve a 2mm, 5mm, or 10mm wide seal on polythene and polypropylene bags, accommodating thicknesses up to 2 x 400 µm for 10mm elements. Models with enhanced power and a wider element wire are ideal for handling challenging sealing tasks, especially in cases where bags are lined with powders.

PRODUCT FEATURES

- Used widely throughout the food industry to pack items such as tea, spices, nuts, fresh produce, meat, frozen foods, and pet food.
- Can be operated using automatic mode or electric foot switch operation.
- Double seal models available (see table below).
- Servicing and spare parts available.
